**Here's what one of our
clients got to say:**

*"From our initial discussions,
through to product release,
SSW were always proactive
in helping us create an
intuitive, and elegant
product..."*

(Owen Taylor - Sportstec)

Code Auditor

Keep your code
healthy with SSW Code Auditor

Are you looking to eradicate bugs and ensure consistency? **SSW Code Auditor** is a tool that allows developers to take control of your code, ensuring large, complex source code can be simplified, cleaned and maintained. The built-in rules focus on the most popular .NET languages (C#, VB.NET) for both Windows Forms and ASP.NET; however, the flexibility of SSW Code Auditor allows the developer to add their own rules to target any language in any text file.

SSW Code Auditor can also integrate with Visual Studio 2005 and Microsoft Team Foundation Server (TFS).

*"With Code Auditor I could turn my coding standards
into tangible rules and enforce these on my team. I
now spend more time reviewing fundamental design
issues and not coding errors."*
